Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The claims have been amended to overcome the rejection set forth in Paper 29. Examiner had indicated that the amendment discussed in the interview filed February 27, 2003 would place the case in condition for allowance. But a further review of the prior art revealed an additional reference that can be utilized against the claims. Accordingly prosecution of the case on its merits continues but the rejection of the claims over DeMichele has been dropped.

The claims have been renumbered from claims 22-27 to 23-28 in order to avoid duplicating claim number 22.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Cain (5,681,608).

Cain discloses a fat product composed of unsaturated long chain fatty acids and medium chain fatty acids (see abstract) in amounts that fall within the range that is set forth in the claims. The product is made from

the interesterification of fats (column 3, lines 16-23). Diglycerides are included as reactants in the process of making the product.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 26 and 28 are rejected under 35 U.S.C. 103(a) as being
unpatentable over Cain (5,681,608).

Cain discloses a fat product composed of unsaturated long chain fatty acids and medium chain fatty acids (see abstract) in amounts that fall within the range that is set forth in the claims. The product is made from the interesterification of fats (column 3, lines 16-23). Diglycerides are included as reactants in the process of making the product. Although the specific amount of diglyceride that is indicated in claim 26 is not specifically mentioned in the references, one of ordinary skill in the art would have expected that an amount of unreacted diglyceride would have remained in the fat product. Also at column 3, lines 4-11 the use of the product in food products, like emulsions and infant formulas is contemplated. Food products that include both water and oil in them typically contain emulsifiers

Art Unit: 1761

and mono- and diglycerides are well known emulsifiers. Also the inclusion of vitamin E in a food product, especially infant formula, would have been an obvious addition to the product in order to meet the dietary needs of the consumer.

Claim 27 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
